August 19, 2020

Chiang Lim
Australian Childcare Alliance – New South Wales
PO Box 660
PARRAMATTA NSW 2124

Dear Chiang,

REQUEST FOR PRICING – COVID-19 DEEP CLEANING FOR CHILDCARE SERVICES

Further to your recent email, Guardian Health Support Services is pleased to provide information regarding our capacity to provide ad-hoc deep cleaning for your members. This is in light of requirements around preventative and/or reactive cleaning in the event of a suspected COVID-19 outbreak.

Bio-Fogging:

Bio-fogging, or chemical fogging, is the distribution of virucidal disinfectant in a fine mist form which settles on surfaces – including hard to reach locations – allowing the solution to go to work in eliminating viruses including Legionella Pneumophilia, C.Difficile, MRSA, E.Coli and Coronavirus.

This solution is only recommended for internal spaces.

The core chemical, Netbiokem DSAM, is a commercial grade disinfectant, that kills Coronavirus in 2 minutes, is non-flammable and non-toxic, and will not damage or discolour any surfaces.

Guardian Health Support Services can mobilise within 1-4 hours of initial contact to commence the biofogging process and all work is carried out by skilled and experienced staff wearing full PPE.

Cost Estimate: *\$0.93/sq. m – minimum 400 sq. m*

Unit 6, 56 Buffalo Road
Gladesville NSW 2111
PO Box 925, Gladesville NSW 1675
ABN 58 105 197 582
T 02 9858 2922
F 02 9804 6647
E info@guardianservices.com.au
guardianservices.com.au

Touch Point Sanitising:

Using Netbiokem DSAM, a commercial grade virucidal disinfectant, our team will manually disinfect all identified high touch points throughout the facility. These might include door handles, push plates, architraves, tapware, toilet surfaces, sinks, rails, play or gym equipment, countertops, desks or other solid surfaces..

The disinfectant will kill Coronavirus within 2 minutes of contact and leave the surface sanitised.

Cost Estimate: *\$47.00/hr for minimum three hours then \$39.50/hr thereafter*

Certification:

Upon completion, Guardian Health Support Services will provide a certificate of completion detailing the scope of works completed, date and time of service and chemicals used. A sample of this certificate is attached.

At this point, if you require any further information or wish to refer your members to our organisation, please feel free to contact me on 02 9858 2922.

Yours sincerely,
Guardian Health Support Services

Todd Boardman
Chief Executive Officer

Certification of Disinfection

XYZ Early Learning Centre

123 Main Street, Smithville, New South Wales, 2468

These premises have been disinfected using Netbiokem DSAM virucidal disinfectant (TGA approved for COVID-19 – ARTG No. 336972) and applied by microdiffusion using an ultra low volume fogging machine.

All surfaces and high touch points in the kitchen and outdoor play area were disinfected using a manual application of Netbiokem DSAM.

Services were carried out between 1445pm and 1830pm on Friday 7 August, 2020.
